Shreyas R H

Senior Software Engineer @ Practo

4.4 years of experience as Full Stack Java/J2ee Developer

✉ shreyas.rh@hotmail.com   📱 +919986700691   📍 Bengaluru, India

WORK EXPERIENCE

Senior Software Engineer
Practo

02/2015 – Present   *Bengaluru*

Software Engineer
Infosys

03/2013 – 10/2015   *Bengaluru*

EDUCATION

Bachelor Of Engineering
Global Academy Of Technology, Bengaluru
(Visvesvaraya Technological University)

2008 – 2012   *75%*

CODING INTERESTS

Hacker Earth
An ultimate hub for programmers.

- Active coder in hacker earth.
- Completed a 1 day challenge of an application called "Book Hub" conducted by capillary technologies and stood below 100 ranking (Bengaluru).
- Have competitive percentile above 98% at HackerEarth
- Link : https://www.hackerearth.com/@shreyas.rh151

Open-Source Social Plugins
Facebook, Twitter, Soundcloud and many more.

- Embedding social plugins to the applications to reduce coding efforts and to make applications more usable and informative.
- Sample Application : https://shreyasrh9.github.io/SocialPlugins/

SUPPORTED CAUSES

Krutagna
A simple web application which triggers an SMS to the party halls to get the confirmation to collect the left out food.

SKILLS

AJAX   Bootstrap   CSS   Data Structures   Github   Github Pages   HTML   J2ee   Java   JavaScript   JPA   jQuery   JSON   JSP   Log4j   MySQL   Openshift   PostgreSQL   RESTful WebServices   Sentry   Spring Boot   Struts 2   Tomcat 8

PROJECTS

QUERENT BI (Tableau Integration)

- Software used : Java/J2EE 1.8, Spring Boot, MySQL, OpenID, Sentry, log4j, JSP, JavaScript, Ajax, CSS, JSON, Bootstrap, Data Structures & Algorithms, Maven, Tomcat 8.
- Features : Platform to access Tableau Dashboards based on user mappings.
- Roles & Responsibilities : Integration with multiple services, End to End development for multiple modules, Code reviews.

Orders (An e-commerce web product)

- Software used : Java/J2EE 1.8, Spring Boot, PostgreSQL, Sentry, log4j, JSP, JavaScript, RESTful web-services, Ajax, CSS, JSON, JPA, Bootstrap, Data Structures & Algorithms, Maven, Tomcat 8.
- Features : Provide the users the below privileges based on the role assigned.   1.
  Admin : User management, products management, customer management, customer group management, review order, split orders.
   2. Regional Sales Manager : Place order for single/group customer, track the status of order.
   3. Fulfillments team: Ship the order to the respective customer addresses.
- Roles & Responsibilities :
   1. Developed wire frames for the application using Apple Sketch and retrieved the CSS properties using Zeplin.
   2. Designed DB structure and application to make the application easily maintainable.
   3. Designed and developed client side components as a separate entity to call the PUT/GET/DELETE/POST services and validate using jQuery/Javascript.
   4. Designed and developed the REST API which connects to DB using JPA and query using JPQL and JDBC template.
   5. Performed unit testing.
   6. Deployed the application to AWS and automated DB and WAR/JAR files backup.
   7. Entire application development ownership (End to End).

OTHER INFO

Date of Birth :
09-Jan-1991

Present Location :
Bengaluru

Marital Status :
Single

Passport Number :
M1607124

PROJECTS

MDF Workflow

- Software used : Java/J2EE, Collection, JDBC, JavaScript, JSP, HTML, CSS, AJAX, JSON, jQuery, Bootstrap, PostgreSQL, Struts 2.x, Data Structures and Algorithms.
- Features : Workflow web application to automate approval process for sales team.
- Roles & Responsibilities :
  1. Designed DB structure and application to make the application easily maintainable.
  2. Developed several business logic.
  3. Client side validations using jQuery/Javascript.
  4. Performed unit testing.
  5. Deployed the application to AWS and automated DB and WAR/JAR files backup.

Builder Quote

- Software used : Java/J2EE, Collection, JDBC, JavaScript, JSP, HTML, CSS, AJAX, JSON, jQuery, Bootstrap, PostgreSQL, Struts 2.x, Data Structures and Algorithms.
- Features : Web application to automate creation, approval and tracking of quote's status.
- Roles & Responsibilities :   ��
  1. Designed DB structure and application to make the application easily maintainable.
  2. Developed several business logic.
  3. Client side validations using jQuery/Javascript.
  4. Performed unit testing.
  5. Deployed the application to AWS and automated DB and WAR/JAR file.

Promomap App

- Software used : Java/J2EE, Collection, JDBC, JavaScript, JSP, HTML, CSS, AJAX, JSON, jQuery, Bootstrap, PostgreSQL, Struts 2.x, Data Structures and Algorithms.
- Features : The application facilitates browsing an inventory of products and submitting a discount promotion for the period of choice. Each promotion submitted will have to be reviewed by a reviewer and approved. Users will be able to search promotions irrespective of promotion status.
- Roles & Responsibilities :
  1. Developed several change requests.
  2. Client side validations using jQuery/Javascript.
  3. Performed unit testing.
  4. Deployed the application to AWS and automated DB and WAR/JAR file.
